

Why do more women choose the Beaufort Memorial

Breast Health Center?

The Beaufort Memorial Breast Health Center was designed to address women's breast health needs, from screening to diagnosis, in a relaxing and serene environment.

SAME-DAY RESULTS

- **The spa-like atmosphere**, cotton gowns and personalized attention are provided to make your visit more comfortable.
- **Onsite radiologists** review your imaging while you wait so that you can leave knowing your results.
- **Board-certified surgeons** provide same-day consultations, enabling you to go from screening to diagnosis in one place for your convenience and peace of mind.
- **Certified imaging and breast nurse navigators** are available to guide you through your care, providing education and offering information and support every step of the way.
- **Savi Scout technology** is designed to make breast surgery easier for women. It's radar technology enables the surgeon to precisely target affected breast tissue during surgery.
- **Automated Breast Ultrasound (ABUS)** is a noninvasive screening ultrasound performed in combination with an annual mammogram. ABUS uses high-frequency sound waves to generate more than 1,200 detailed images of the breast that give providers a comprehensive, 3D view of your breasts.
